Alongside with this, students in veterinary medicine have needed knowledge and skills to prevent the occurrence of infectious, parasitic and fungal diseases found in the human animals (there are more than 180 of them). In terms of implications, veterinary medicine students need to acquire knowledge and skills necessary for serving as future experts in the judicial system (as outside the judicial system industry). This is a significant investment in faculty and infrastructure development. In this regard, the new tower is dedicated to the Faculty of Veterinary Medicine.
